WHO AM I?

I am a Software Engineer with 7+ years of experience in the sector. I consider myself a hard-working and curious person who understands life as a continuous learning and always tries to learn new things and help others. I am interested in clean code practices, TDD and software architecture.

Java

NodeJS

Spring Framework

SQL

Python

Bash

EXPERIENCE

2017 – 2018
Part time

Trainee   **everis**

I worked on a project for the Madrid Government giving support and developing new features.

- Corrected multiple errors related to previous versions of the application.

- Improved the usability of the application to avoid manual errors of the users.

- Developed new features to adjust the application to new changes in the law.

```
Java  /  Spring Framework  /  SQL  /  Javascript  /  Linux  /  SVN
```

2018 – 2019

Solutions Assistant   **everis**

I worked on multiple projects for the Madrid Government.

- Automated manual tasks reducing the time implied by more than 50%.

- Improved the performance of different batch processes, increasing its performance a 30%.

- Created new REST/SOAP services.

- Analyzed the development of new features with the Team Leader and customers.

```
Java  /  Spring Framework  /  SQL  /  Javascript  /  Linux  /  SVN
```

2019 – 2022

Software engineer - Full remote   **Yapiko Software House S.L.**

I worked on a sports betting solutions international project following Agile methodologies in a multicultural and international environment.

- Worked on the migration from Java 8 to Java 11.

- Refactored many code pieces to improve the maintainability and readability of the codebase.

- Fixed different types of bugs to enhance the performance and correctness of the system.

- Created several Spring Boot modules to meet new customers' requirements.

- Applied TDD and added new unit and integration tests to make the system more reliable.

```
Java  /  Spring Framework  /  SQL  /  JUnit  /  Javascript  /  Linux  /  Git
```

| 2022 – Present | **Software engineer - Full remote** | **Smadex** |

I work on different high-performing modules in the ad tech industry, helping to increase the company's growth against big competitors.

- Participated in different meetings to make architectural decisions.

- Lead different features' development to improve the product following clean code practices.

- Migrated the database migration tool to help the team make easier and faster database changes.

- Worked on a project to apply a Deep Neural Network model to improve the decision-making of the platform.

- Participated constantly in code reviews to make the codebase more reliable and maintainable.

- Mentored junior employees and new joiners.

- Joined and worked on different workshops and initiatives to share knowledge among all the team members.

```
NodeJS  /  Java  /  Spring Framework  /  Python  /  Bash  /  AWS  /  Docker  /  Git
```

EDUCATION

| 2014 – 2018 | **Software engineering degree** | **Rey Juan Carlos University** |

LANGUAGES

Spanish - Native
English - Advanced

CERTIFICATIONS

AWS Developer

AWARDS

Best academic record in Software engineering degree
